SUMMARY

Incoming Computer Science and Management student with a strong foundation in building Python data pipelines and automating Power BI reporting. Adept at designing relational databases, crafting custom DAX queries, and prototyping in Figma. Seeking a **part-time role** where I can contribute analytical and software development skills to a dynamic team alongside my academic pursuits.

EDUCATION

University of Lethbridge

BSc, Computer Science

2026 - 2028

Calgary, AB

Southern Alberta Institute of Technology (SAIT)

Diploma, Software Development (GPA: 3.94 / 4.00)

2024 - 2025

Calgary, AB

Foreign Trade University & University of Bedfordshire

BSc, Business Studies (GPA: 3.75 / 4.00)

2017 - 2021

Ho Chi Minh, Vietnam

CERTIFICATIONS

- Google Data Analytics Professional Certificate: Coursera – Issued by Google (2025)

SKILLS

Data Analytics & BI: SQL (Proficient), Python (Pandas, NumPy, Scikitlearn, Matplotlib, Seaborn, Plotly), R (Foundational), Power BI, Tableau, Exploratory Data Analysis (EDA)

Software Engineering: JavaScript, TypeScript, C#, Java, HTML5/CSS3, React.js, Next.js, React Native, Node.js, Express.js, FastAPI, Flask, RESTful APIs

Databases & DevOps: PostgreSQL, Firebase/Firestore, Supabase, Docker (Foundational), Git/GitHub, CI/CD Concepts, Figma (UI/UX)

Business & Strategy: Requirements Gathering, Competitor Analysis, Technical Documentation, SWOT, PESTEL, COSMIC, TOWS frameworks

PROFESSIONAL EXPERIENCE

Intage Vietnam (Techniverse Team) | Data & Software Development Intern

2026 - Present

- Engineered backend Python scripts using pandas and openpyxl to parse and transform automated CSV feeds, generating dynamic, filterable Excel reports that reduced manual data-preparation time for business users by 30%
- Wrote custom DAX queries in DAX Studio and integrated them with Power BI REST APIs to extract cloud-stored enterprise data, automating downstream reporting and cutting report-generation time in half
- Database Design & Security: Co-designed relational databases for internal web tools, implementing audit log tables and strict structural constraints to ensure data safety, integrity, and traceability.
- Designed mobile UI/UX wireframes in Figma for a high-fidelity mini-app and used Figma Make low-code AI tools to build the front-end with React.js, accelerating the Survey Management web-application prototype delivery by two weeks

PROJECTS

Tech Connect Platform | [GitHub](#)

- Architected a full-stack community prototype focused on modular architecture, system interoperability, and clean code principles.
- Integrated Clerk for secure identity management and designed relational schemas in PostgreSQL to handle high-concurrency data.

Mental Health AI Application | [GitHub](#)

- Developed a mobile-first application utilizing React Native and TypeScript for strict type safety and cross-platform performance.
- Integrated the Gemini API with custom structured JSON schemas to extract predictable, type-safe data for automated, personalized coping mechanisms.
- Leveraged Supabase (PostgreSQL) for real-time data persistence, structured storage, and secure authentication.

Movie Explorer | [GitHub](#)

- Engineered a responsive web application fetching real-time media data from multiple external REST APIs (TMDB, Simkl) with secure Firebase state management.

Business Strategy Project | [Stonepoint Ltd – Assignment](#)

- Applied SWOT, PESTEL, COSMIC, and TOWS frameworks alongside a 7Ps Marketing Mix to evaluate macro/micro-environments and formulate data-backed recovery strategies and digital transformation plans.

CONTINUOUS LEARNING & FUTURE FOCUS

Advanced Technical Pursuit: Actively expanding knowledge in Data Science (DS), Machine Learning (ML), Deep Learning (DL), and AI Engineering.

Target Application: Passionate about applying advanced predictive modeling and intelligent algorithms to drive process automation, workflow optimization, and data-driven decision-making in future enterprise environments.
